

Group No: 10

Meeting -2

5th Feb, 2021

3:10 - 4:30 PM

DISCORD

Meeting called by: Manav Vagrecha

Type of Meeting : Informal Meeting

Facilitator : Parth Patel

Notetaker: Yashvi Pipaliya

Time Keeper: Yashvi Pipaliya

Attendees : Jeet Shah

Kesha Bagadia
Manav Vagrecha
Manal Shah
Parth Patel
Yashvi Gandhi
Shreyansh Shah
Mihir Chauhan
Yashvi Pipaliya

Please look: Working of already established car rental service and collecting its pros and cons

Please bring: Document containing details of your research. Please keep a document file ready to write notes and suggestions.

Agenda Item:

To brainstorm upon various basic features needed to build a Online Car Rental/ Lending Website and take note on problems faced

Discussion:

The Car Rental/ Lending website should have the following bare minimum features

- The user should be able to browse various cars for renting purposes
- The lender should be able to add their car to the system
- The system shall allow the customer to create a new user account
- The system shall allow the customer to change account password.
- The administrator shall be able to view all the user accounts
- Every user is only able to access his/her own data.
- The system should provide a option “Rent the car” on every car available
- The system shall allow the customers to cancel reservations using reservation confirmation number.
- The system shall take the the dates and city from the customer for which the customer wants to rent the car
- The customer will be able to rent or lend a car only after creating an account and submitting the required details to the system
- The user should be provided with appropriate information on every car
- The system shall allow owners to display all customers' rent records
- The system shall ask the lender to enter date and time for which the car will be available for renters
- The system shall allow the lender to display lists of their car.
- The system shall inform the lender whenever a renter confirms their car

Conclusion:

After incorporating the above bare minimum features, there is still a need to expand the scope of these features and evaluate the business and functional requirements over non-functional requirements such as performance , scalability, reliability, security, maintainability etc.

Other Information:

Action Items	Person Responsible	Deadline
1. Reading about models like waterfall model, evolutionary models, iterative models and spiral models.	Manal, Mihir, Manav	10 Feb, 2021
2. Reading about Agile methods like Scrum, Kanban, Scrumban, SAFe, DSDM, LeSS etc.	Yashvi P, Shreyansh, Kesha	10 Feb, 2021
3. Establishing various criteria for the selection of a perfect model for the project	Parth, Yashvi G, Jeet	10 Feb, 2021

Agenda For Next Meeting:

Finalising an appropriate model for the project
