Please look: The different applications available for creating Frontend and Backend for our website.

Please bring: Please keep a document file ready to write notes and suggestions.

Agenda Item:

To select tools like coding language and the application used for the development of our website.

Discussion:

- Exploring different coding languages that we can use for developing our website
- For Front-end development
 - Decided to work with the following language due to the familiarity of it among the team members
 - ReactJS
- For Back-end development
 - Decided to work with following two languages on the basis of familiarity of these languages among the team members
 - NodeJS
 - ExpressJS
- After discussing the pros and cons of various applications available for coding we concluded that Visual Studio Code is the best choice as it includes built-in support for IntelliSense code completion, rich semantic code understanding and navigation, and code refactoring.

Conclusion:

Finalized the application and coding language we will be using for developing the website.
